

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

For a petition to be considered valid it must:

1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-24519

Stream : Unnamed Tributary St.
Joseph River

Applicant : City of Fort Wayne - City Utilities
Len Poehler - Director
One Main Street
Room 480
Fort Wayne, IN 46802

Description : Approximately 1560 lineal feet of eroded stream banks will be stabilized with 3' by 3' gabion baskets. The gabions will be keyed into the stream bed at its base. the gabions will establish a uniform 12' bottom. Only the front side of the gabions will be exposed and will be a maximum of 2.5' high at the toe of the bank. Some riprap, shot rock and erosion control blankets will be utilized from the installation of the gabions and for erosion control. Also, temporary rock check dams will be placed at two locations. Kramer Ditch reconstruction is proposed. Details of the project are contained in information and plans received at the Division of Water on September 28, 2007.

Location : Beginning at the Woodbrook Drive crossing and extending downstream approximately 1100 feet; also beginning at the Woodbrook Drive crossing and extending upstream (southwesterly) approximately 475 feet
DOWNSTREAM: at Fort Wayne, Washington Township, Allen County
J B Richardville Reserve, Cedarville Quadrangle
Quad Code: 4108521
UTM Coordinates: Downstream 4556416 North, 658956 East
UPSTREAM:
UTM Coordinates: Upstream 4556368 North, 658616 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-24568

Stream : Potts Ditch

Applicant : Trinity Park United Methodist Church
Mike Manning
207 West Park Avenue
Greenfield, IN 46140-1445

Description : A 130' by 160' asphalt parking lot will be constructed at grade as part of a proposed building addition located out of the floodway. Details of the project are contained in information and plans received at the Division of Water on October 24, 2007 and November 16, 2007.

Location : Along the northeast bank of the stream approximately 500' east and 260 south of the Park Avenue stream crossing
near Greenfield, Center Township, Hancock County
NE¼, NE¼, SW¼, Section 32, T 15N, R 7E, Greenfield Quadrangle
Quad Code: 3908577
UTM Coordinates: Downstream 4450307 North, 605046 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-24589

Stream : West Fork White River

Applicant : *Department of Natural Resources
Division of Fish & Wildlife
Gregg McCollam
402 West Washington Street, Room W273
Indianapolis, IN 46204-2781

Description : A 360' by 12' gravel drive will be constructed along the southeast side of the northbound lane of State Road 67. A 75' by 75' gravel parking area will be constructed at the southeast end of the drive. An 8' by 450' footpath will be constructed from the parking lot to an area at the confluence of Sycamore Creek and West Fork White River. An 18" culvert will be placed under the gravel drive at the toe of the slope on the highway right-of-way. Approximately 500 cubic yards of fill for the drive will extend approximately 70' into the forested area. Details of the project are contained in information and plans received at the Division of Water on November 1, 2007.

Location : Approximately 2500' northeast of the State Road 67 and State Road 39 intersection
near Martinsville, Clay Township, Morgan County
SE $\frac{1}{4}$, SW $\frac{1}{4}$, SW $\frac{1}{4}$, Section 9, T 12N, R 1E, Martinsville Quadrangle

30 Day Public Notice Report

Application # : FW-24605

Stream : Unnamed Tributary Cool Creek

Applicant : Town of Westfield
Curt Cooley
2706 171st Street
Westfield, IN 46074

Description : Phase 1 consists of new pedestrian trail construction along the Monon corridor from the north side of 146th Street to the south side of 156th Street, including the at-grade street crossing at 146th Street. The trail will closely follow the existing horizontal and vertical alignment of the abandoned railroad corridor. The typical trail cross section will consist of one 12' wide paved path bordered by 2-4' wide stabilized shoulders. An existing railroad culvert will be retained for crossing an unnamed tributary to Cool Creek. A potential pedestrian trail head location has been identified near Greyhound Pass. The total length of Phase 1 is approximately 1 mile. Details of the project are contained in information received electronically at the Division of Water on November 9, 2007 and in plans and information received at the Division of Water on

Location : Along the Monon corridor from the north side of 146th Street to the south side of 156th Street
near Westfield, Washington Township, Hamilton County
Section 13, T 18N, R 3E, Westfield Quadrangle
Quad Code: 4008612

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

30 Day Public Notice Report

Application # : FW-24621

Stream : Hanna Arm Of Tuesburg Ditch

Applicant : LaPorte County Board of Commissioners
Rick McVay
813 Lincolnway, Ste. 301
LaPorte, IN 46350-3400

Description : The LaPorte County Board of Commissioners is preparing design plans to rehabilitate the LaPorte County Bridge No. 185 over Hanna Arm of Tuesburg Ditch. The project is located along County Road 650 West over Hanna Arm of Tuesburg Ditch located approximately 0.11 miles south of the intersection of County Road 650 West and Bigler Road. The proposed project will rehabilitate the structure to correct water seepage through beams, cracking and leaching at abutments, and deteriorating wingwalls. The project consists of placing riprap over geotextiles at the piers and channel banks for scour protection. Approximately 0.72 cubic yards of riprap will be placed around the piers (0.35 cys/lft - left side and 0.37 cys/lft - right side). The riprap will extend 24' both upstream and downstream. This will result in approximately 1,051.3 square feet of riprap protection (652 sqft - left side and 399.3 sqft - right side). Details of the project are contained in information received electronically at the Division of Water on December 3, 2007 and in plans and information received at the Division of Water on

Location : This proposed project is located along County Road 650 West over Hanna Arm of Tuesburg Ditch located approximately 0.11 miles south of the intersection of County Road 650 West and Bigler Road, LaPorte County, Indiana. The project limits extend just south of Hanna Arm of Tuesburg Ditch to just north of Hanna Arm of Tuesburg Ditch. Hanna Arm of Tuesburg Ditch flows westward across the project limits and continues in a southwestwardly direction into the Kankakee River.

30 Day Public Notice Report

Application # : FW-24622

Stream : Yellow River

Applicant : LaPorte County Board of Commissioners
Rick McVay
813 Lincolnway, Ste. 301
LaPorte, IN 46350-3400

Description : The LaPorte County Board of Commissioners is preparing design plans to rehabilitate the LaPorte County Bridge No. 186 over Yellow River and Kankakee River. The project is located along County Road 650 West over Yellow River and Kankakee River located approximately 0.11 miles south of the intersection of County Road 650 West and Bigler Road, LaPorte County, Indiana. The proposed project will rehabilitate the structure to correct cracks in the pavement surface, deterioration between in beams, scaling on the piers, and a broken wingwall. Riprap will be placed over geotextiles at the piers and channel banks for scour protection. Approximately 0.75 cubic yards of riprap will be placed around the piers of Yellow River (0.30 cys/lft - left side and 0.35 cys/lft - right side). The riprap will extend 24 feet both upstream and downstream. This will result in approximately 494.9 square feet of riprap protection (316.5 sqft - left side and 178.4 sqft - right side). Details of the project are contained in information received electronically at the Division of Water on December 3, 2007 and in plans and information received at the Division of Water on

Location : This proposed project is located along County Road 650 West over Yellow River and Kankakee River located approximately 0.11 miles south of the intersection of County Road 650 West and Bigler Road, LaPorte County, Indiana. The project limits extend just south of Yellow River to just north of Kankakee River. Yellow River flows westward across the project limits and continues to flow in a northwestwardly direction into Kankakee River. Kankakee River flows in a westward direction across the project limits.

Application # : FW-24623

Stream : West Fork White River

Applicant : Delaware County Commissioners
Michael Denton
100 West Main Street
Room 309
Muncie, IN 47305

Description : A 1525' area will be filled in the east (left) floodplain of the West Fork White River for the replacement of severely damaged pavement. The fill will vary in depth from -3.48" to +12.96" for a total of 318.1 square feet of fill. It will be along existing County Road 300 South alignment which has 2:1 sideslopes. The finished elevation of the fill will vary along the roadway according to vertical curve requirements. The concrete and asphalt pavement will be constructed as part of this fill. County Bridge 130 will be rehabilitated as part of this project, however no fill will be placed in the channel and the bridge will remain at its current location on existing abutments. High-Performance Turf Reinforcement Mats will be implemented on the south road sideslope in order to curtail an erosion problem resulting from weir flow. Details of the project are contained in information received electronically at the Division of Water on December 4, 2007 and in plans and information received at the Division of Water on

Location : This project is located approximately 0.5 miles west of the intersection of County Road 300 South with State Road 37 between Daleville and Yorktown near Daleville, Mount Pleasant Township, Delaware County
Section 30, T 20N, R 9E, Gilman Quadrangle

30 Day Public Notice Report

Application # : FW-24625

Stream : Nineveh Creek

Applicant : Camp Atterbury JMTC
Anthony W Martin
Camp Atterbury JMTC
DPTM
Edinburgh, IN 46124-5000

Description : The proposed project would install cable concrete mats and riprap to harden and stabilize a stream crossing. The area impacted below the ordinary high water mark will be approximately 812 square feet. The crossing will be excavated to an approximate depth of 24.5 which will result in the installed materials being at the same elevation as the existing stream bed. Geotextile fabric will be placed between the stream and the riprap sub-base. The sub-base will consist of 8" of 6" riprap and 8" of 2" riprap on top of which the cable concrete will be keyed into the upstream side. An apron of 6"- 8" riprap will be placed 10' out on the upstream side of the cable concrete which is then followed up by 5' of 6" - 8" riprap on the downstream side. Standard erosion control practices will be utilized during and after construction including: silt fencing, and hydro seed mulch with native vegetation. Details of the project are contained in information received electronically at the Division of Water on December 4, 2007 and in plans and information received at the Division of Water on December 6, 2007.

Location : Approximately 0.5 miles east of Lincoln Road and 0.7 miles west of County Line & Schoolhouse Road intersection

Application # : PL-20912

Lake : Upper Fish Lake

Applicant : Fish Lake Conservancy District
306 North Lilac Drive
Walkerton, IN 46574-9525

Description : An existing 140' long by 150' wide sediment basin located at the mouth of Fish Creek constructed and previously approved under PL-15694 will be restored to its original condition by hydraulically dredging a maximum of 4' of accumulated sediment from the basin. The excavated material will be transported to an upland detention area where it will be dewatered before being transported to an offsite disposal area. Adequate detention time will be provided to allow suspended sediments to settle out of the decanted water before returning the water to the stream. Details of the project are contained in information and plans received at the Division of Water on November 8, 2007.

Location : At the mouth of Fish Creek (inlet to Upper Fish Lake)

Lake : Lake of the Woods

Applicant : Bremen Conservation Club
8745 North Shore Drive
Bremen, IN 46506-8504

Description : The Bremen Conservation Club was issued a permit PL-20218 in March of 2006. We were not able to get adequate funding until recently and JF New cannot start on the project until May, 2008. Thus we need to reapply. There are very few changes from the original application. We want to restore approximately 500' of shoreline on Lake of the Woods by utilizing a combination of bio-engineering techniques in association with native plants. JFNew will utilize a combination of lift structures and vegetated biologs to create a living seawall in conjunction with a narrow filter strip. Details of the project are contained in information received electronically at the Division of Water on December 4, 2007 and in plans and information received at the Division of Water on
